performance and
competitiveness.

AGRI-FOOD SPECIALISTS

CADEC uses a team approach based on communication to deliver truly effective solutions.

Our team's past achievements and thirst for challenge keep us at the top of the high-tech market.

BOOSTING PRODUCTION CAPACITY

Vergers Paul Jodoin inc.

A few years ago, Vergers Paul Jodoin inc., producers of the Tradition brand of fruit juice, decided they needed a new fully automated plant to boost their production capacity.

Our mandate included reprogramming the pasteurization system, CIP system, related services, and mix-management system. Today, the plant is automated, the pasteurization system operates with enhanced precision, and the washing and mix-management systems deliver greater flexibility and efficiency.

"We couldn't be happier with CADEC's involvement, which produced outstanding results. They really are the solution people."

Sylvain Jodoin
Production Manager

PAST ACHIEVEMENTS

Production Lines
Bread, pastry,
milk, cheese,
beverages, and juice.

Equipment
Pasteurizers
Mixers
Ovens
CIP equipment
Packaging equipment
Palletizing systems

Software
Recipe management
Production execution
Traceability

S SERVICES

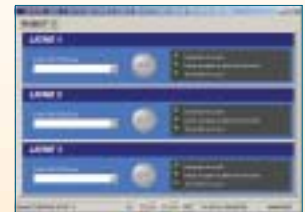

Engineering	Digital vision system integration
Process engineering	Industrial programming and networking
Robotics	Technical consulting, specifications, and drawings
Project management	Specialist secondment
Equipment design and manufacturing	24-hour service
Control panel design and manufacturing	Turnkey projects

GC suite harmonie

Unifying systems, information technologies, and automated processes

S SOFTWARE

- GC-Recipe
- GC-Execution
- GC-PAL-DCI

S SYSTEMS

- GC-CIP
- GC-Pasto
- GC-Mix
- GC-Oven
- GC-Pallet
